Kirana Logistics Group

Annual Report 2025

Kirana Logistics Group Public Company Limited operates warehousing, line-haul and last-mile delivery across Thailand, Indonesia, Vietnam and Malaysia. Headquarters: Bangkok, Thailand. Founded 2009.

This is a fictional company and document created by DevXLabs for candidate assessment. Any resemblance to a real company is coincidental.

Letter from the Chief Executive Officer

Dear shareholders,

2025 was a year of disciplined growth for Kirana. Revenue rose 10.0% to THB 8,420 million and net profit reached THB 531 million. We expanded our cold-chain capacity in Indonesia, where demand from grocery and pharmaceutical customers continues to outpace supply.

Our fleet transition accelerated. We added 96 electric trucks during the year, mostly in Bangkok and the Klang Valley, and installed rooftop solar at six more facilities.

The fourth quarter tested our network. Severe flooding in southern Thailand closed sections of the main southern highway for several weeks and forced us to reroute line-haul traffic. Our teams kept customers informed and service recovered by December. I want to thank every colleague who worked through those weeks.

Looking ahead, we will open four new facilities in 2026 and continue to invest in automation, data and our people.

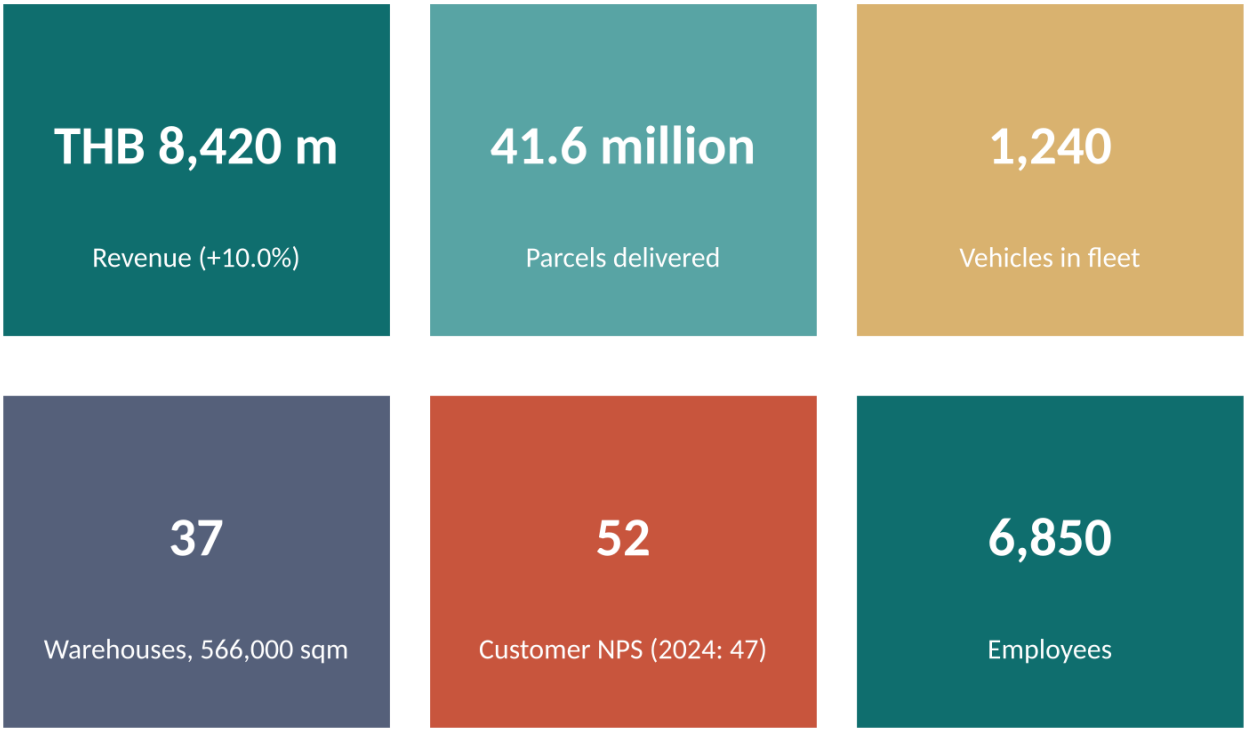

Arunee Wongsakul
Chief Executive Officer
Bangkok, 20 February 2026

2025 at a glance · Financial review · Revenue analysis · Operations · Facilities and network · Fleet and sustainability · People and safety · Risks and outlook · Appendix A: Glossary and errata · Appendix B: Standard contract tariff 2026

2025 at a glance

The headline numbers for the year are summarised below.

Financial review

Revenue grew for the third consecutive year, supported by new contract logistics customers in Indonesia and higher e-commerce parcel volumes in Thailand. Gross margin improved as warehouse utilisation rose.

Table 1. Five-line financial summary

THB million	2023	2024	2025
Revenue	6,910	7,655	8,420
Gross profit	1,451	1,646	1,853
EBITDA	1,036	1,186	1,347
Net profit	412	468	531
Capital expenditure	610	742	905
Net debt (31 Dec)	1,880	2,050	2,310

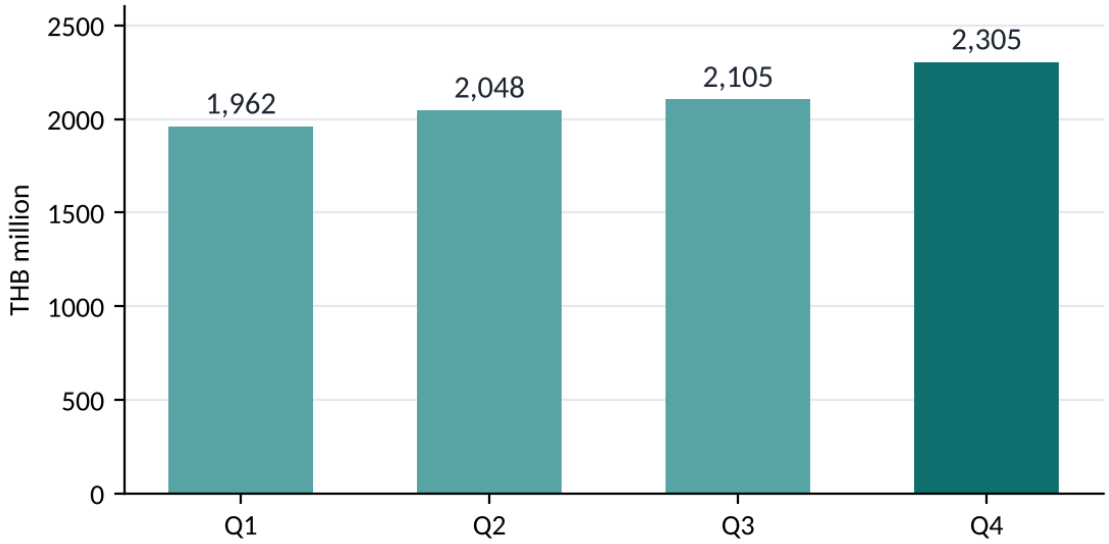

Capital expenditure increased to fund cold-chain racking, electric vehicles and solar installations. Net debt rose accordingly but remains within our internal limit of 2.0 times EBITDA.

Revenue figures are reported in Thai baht. Indonesian, Vietnamese and Malaysian revenues are translated at average exchange rates for the year.

Revenue analysis

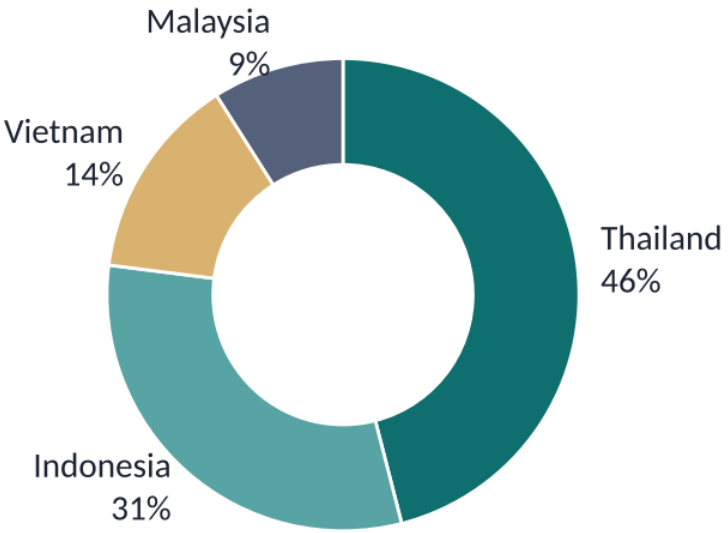

Revenue built steadily through the year. The fourth quarter was the strongest, driven by peak-season e-commerce volume, despite the flood disruption in southern Thailand.

Figure 1. Revenue by quarter, 2025 (THB million)

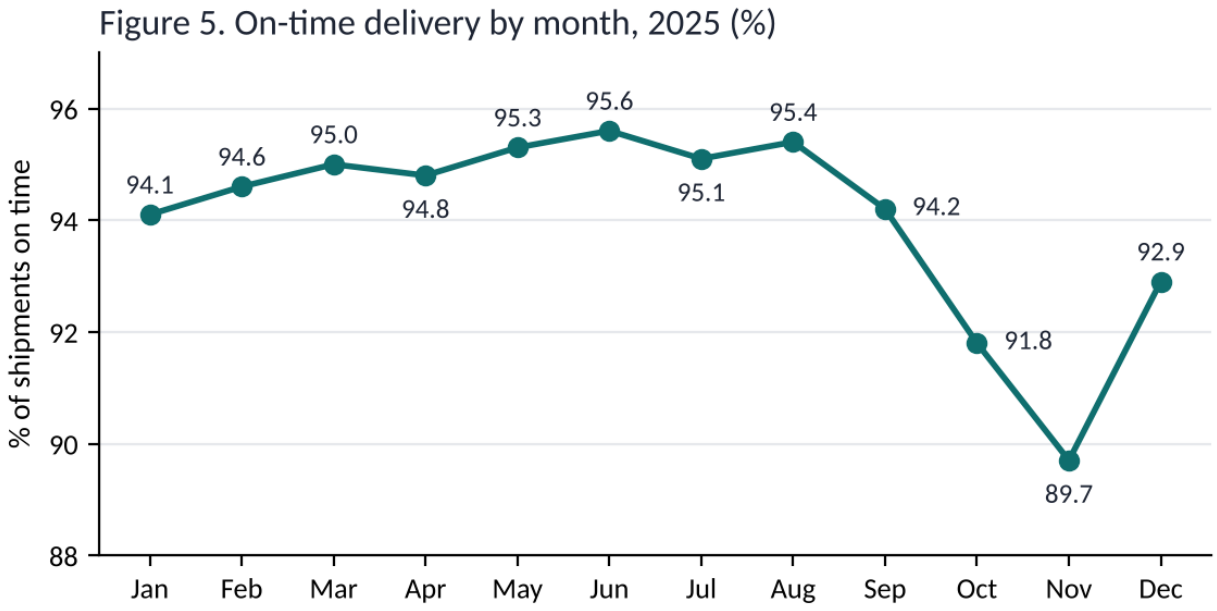

Thailand remains our largest market, while Indonesia was the fastest-growing contributor.

Figure 2. Revenue by country, 2025 (share of total)

Operations

We delivered 41.6 million parcels in 2025. Full-year on-time delivery (OTD) was 94.0%, measured as the share of shipments delivered within the committed window.

Performance dipped in the fourth quarter. Flooding in southern Thailand closed sections of the main southern highway, and line-haul to Hat Yai was rerouted through slower inland roads. Service recovered in December once the highway reopened.

Warehouse productivity, measured in order lines picked per labour hour, improved 8% year on year following the roll-out of goods-to-person robotics at Lat Krabang and Cikarang.

Facilities and network

At the end of 2025 we operated 37 warehouses. Table 2 lists the 23 major facilities of 8,000 square metres or more; smaller satellite sites are not listed. Utilisation is the average share of usable pallet positions occupied during the year.

Our network strategy is to keep a large hub near each capital city, supported by cross-dock sites that shorten last-mile distances in secondary cities. Cold-chain capacity is the fastest-growing part of the network, and the Cibitung cold store in Bekasi operated close to full capacity for most of the year.

We review utilisation monthly. Sites that remain below 65% for two consecutive quarters are placed on a consolidation watch list, while sites above 92% trigger an expansion study.

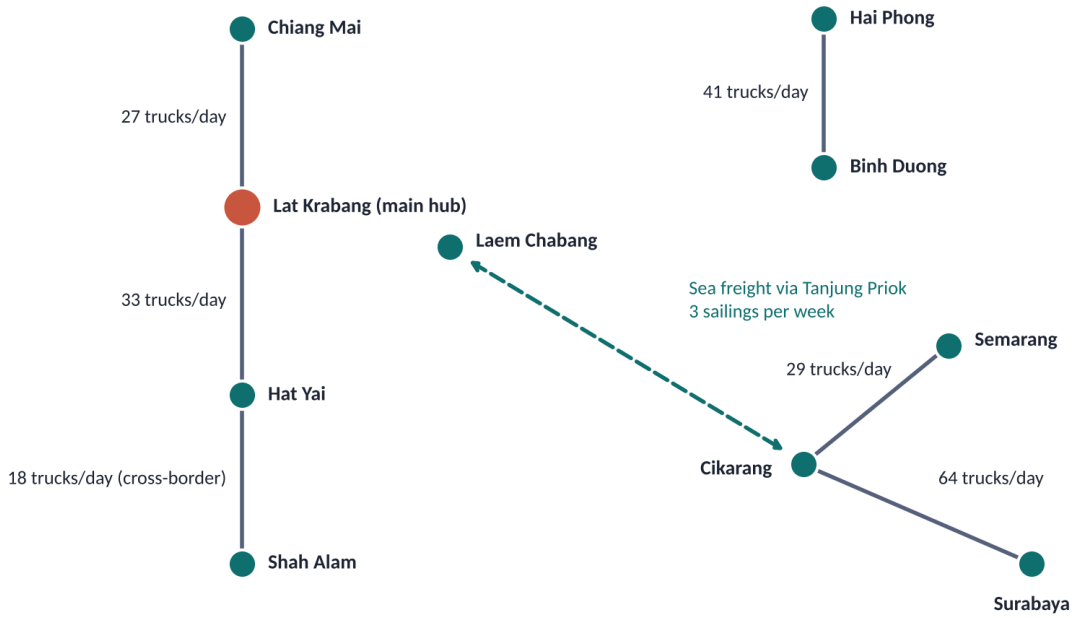

Figure 3. Core line-haul network, December 2025

Thailand and Malaysia are connected by road through the Hat Yai cross-border lane. Freight between Thailand and Indonesia moves by sea.

Table 2. Major facilities at 31 December 2025

Code	Location	Country	Type	Area (sqm)	Utilisation 2025	Opened
TH-LKB	Lat Krabang, Bangkok	Thailand	Ambient + cross-dock	62,000	91%	2011
TH-BNA	Bang Na, Samut Prakan	Thailand	Cold chain	24,500	88%	2016

Fleet and sustainability

Table 3. Fleet by vehicle type and country, 31 December 2025

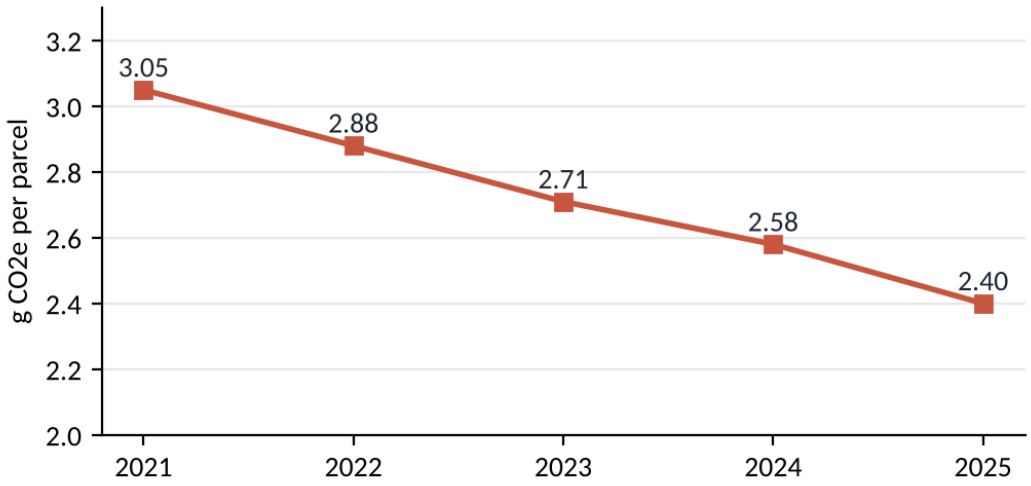

Vehicle type	Thailand	Indonesia	Vietnam	Malaysia	Total
Diesel heavy truck	310	228	96	64	698
Diesel light truck	148	112	41	23	324
Electric light truck	132	44	18	24	218
Total	590	384	155	111	1,240

Our electric fleet grew from 136 vehicles at the end of 2024 to 218 at the end of 2025, an increase of 82. Electric vehicles now make up 18% of the fleet. All new light trucks ordered for urban routes in Thailand and Malaysia are electric.

Table 4. Greenhouse gas emissions

	2023	2024	2025
Scope 1 (tCO2e)	98,400	101,200	99,700
Scope 2 (tCO2e)	14,300	13,900	12,100
Total (tCO2e)	112,700	115,100	111,800

Figure 4. Emissions intensity (grams CO2e per parcel delivered)

Our target is a 30% reduction in emissions intensity per parcel by 2030, measured against the 2023 baseline. Rooftop solar now supplies 31% of the electricity used in our warehouses.

People and safety

Table 5. Employees by country at year end

Country	Employees 2024	Employees 2025
Thailand	2,980	3,120
Indonesia	1,960	2,240
Vietnam	840	910
Malaysia	560	580
Total	6,340	6,850

Women held 38% of management positions at the end of 2025, up from 34% a year earlier. We delivered an average of 26 hours of training per employee.

Our lost-time injury frequency rate (LTIFR) improved to 0.42 per million hours worked, from 0.55 in 2024. There were no work-related fatalities. Forklift pedestrian separation was completed at all major facilities.

Principal risks

- **Fuel prices.** Diesel represented 27% of our cost of services in 2025. Fuel surcharges recover most, but not all, increases within one to two months.
- **Customer concentration.** Our ten largest customers generated 41% of revenue.
- **Currency.** A weaker Indonesian rupiah reduces the baht value of our Indonesian earnings.
- **Extreme weather.** Flooding and storms can close roads and facilities, as the fourth quarter of 2025 showed.
- **Cybersecurity.** A ransomware attempt in June 2025 was detected and contained with no customer data lost.
- **Regulation.** Changes to electric-vehicle incentives in Thailand could raise the cost of our fleet transition.

Outlook for 2026

We expect revenue growth of 11% to 13% in 2026. Planned capital expenditure is approximately THB 1,050 million.

- Open four new facilities: two in Indonesia, one in Vietnam and one in Thailand.
- Add 120 electric light trucks, bringing the electric share of the fleet above 25%.
- Extend goods-to-person robotics to Surabaya and Binh Duong.

We do not plan to enter any new country in 2026.

Appendix A: Glossary and errata

- **OTD**: on-time delivery, the share of shipments delivered within the committed window.
- **LTIFR**: lost-time injuries per million hours worked.
- **NPS**: Net Promoter Score, from our biannual customer survey.
- **FTL**: full truckload.
- **Utilisation**: average share of usable pallet positions occupied.

Errata

The Letter from the Chief Executive Officer states that 96 electric trucks were added in 2025. The correct figure is 82, as reported in the Fleet and sustainability section. The electric fleet was 218 vehicles at 31 December 2025.

Appendix B: Standard Contract Tariff 2026

Approved by the Board of Directors on 12 December 2025

Service	Unit	Rate (THB)
Ambient pallet storage	per pallet per month	420.00
Cold-chain pallet storage (2-8 C)	per pallet per month	780.00
Frozen pallet storage (-18 C)	per pallet per month	1,150.00
Pick and pack (B2C order)	per order	18.50
Line-haul FTL Bangkok - Hat Yai	per trip	21,500.00
Last-mile parcel up to 2 kg	per parcel	38.00
Returns handling	per item	12.00

Rates exclude 7% VAT. Effective 1 January 2026.
Volume discounts are set out in Schedule C (not included in this report).
